8 December 2008

October Sightings Part 2

More sightings for October 2008 have been added. We are trialling a new way of displaying sightings, which will be seen on this page. You can also download the sightings in an Excel file, which offers the opportunity to view sightings by Operator, Fleet Number, Registration or Location order. Please note that the Excel file cannot be edited. Please e-mail us your comments on these new formats for presenting sightings and whether it is easier to read and use.

Current '58' registration details available to download for *members*

A listing of current (to early December 2008) '58' registrations available in Excel format. Click here to access the Members Area (username and password required)
